

Kattack Portable GPS Instructions (refer to Sailing Instructions 7.4, 8.4 & 9.1-3)

1. At the morning pre-race briefings, a charged Kattack Tracking Unit will be supplied to each yacht. The Tracking Unit will already be on and tracking (no need to activate).
2. Mount the Tracking Unit as close to centerline as possible at the stern of the boat. The Tracking Unit has a Velcro strap for easy mounting. If the Tracking Unit cannot be mounted on the stern centerline, please write on the label what the offset is from the stern to where the Tracking Unit is mounted (in meters).
3. At the end of each racing day return the Tracking Unit to the Race Office. You must return the unit each day, even if there is no racing. The units need to be charged overnight and will be reissued at the daily pre-race briefing.
