

**2016 St Barths Bucket
Notice 5**

Yachts with Identical Time Allowance(s)

If two or more yachts have the same rating allowance in one or more wind and sea state condition, the decision about who will be starting first in the pursuit starting procedure will be determined by the slowest average of the rating allowances in the same sea condition; if the tie is still happening, it will be broken by also considering the average of the other sea state rating allowances.

In case the tie is not yet broken, then a coin flip will decide the starting sequence.
